

A large industrial vacuum waste handling system is installed in a factory. The system consists of a network of large, polished metal pipes that run horizontally and vertically. A flexible, corrugated metal hose is connected to the system, leading to a large industrial machine on the right. The machine has a control panel with several buttons and a digital display. The background shows a typical industrial environment with shelves, boxes, and other machinery.

VACUUM WASTE HANDLING

 **LUNDBERG** TECH
Our waste handling keeps production going

LUNDBERG TECH CONVERTS WASTE AND COVERS ALL ASPECTS OF WASTE HANDLING FROM PRINTING, PRODUCTION AND PACKAGING MACHINES

Capture
Waste in the process line where it is created. It enables higher production speed, less downtime, while removing dust from production lines.

A photograph showing a capture system installed on a printing machine. The system consists of a large, flexible, white, bell-shaped hood that is positioned over the machine's output area to capture dust and debris as it is produced.

Convey
Waste by vacuum, transport in a pipe system. Can cover unlimited distances and amount of machines.

A photograph of a vacuum conveyor system installed in a factory. The system features a long, horizontal, white, flexible pipe that runs through the facility, connected to a vacuum source. The pipe is supported by a metal frame and has a series of rollers or guides to keep it in place.

Cut
Waste with the unique and reliable Granulator. It adds value by reducing the volume and easily conveys the waste over long distances.

A close-up photograph of a granulator machine. The machine has a large, circular, stainless steel opening with a heavy-duty, rotating blade inside. The blade is designed to cut and shred waste into small, uniform pieces.

Collect
Waste in a sack, TubeBag or container. Location flexibility for a clean waste handling process and easy disposal.

A photograph of a collection system. It features a large, blue, rectangular container with a white, flexible, bell-shaped hood attached to the top. The hood is positioned over a waste source, and the container is designed to collect and store waste in a clean and organized manner.

Compact
Waste by a compactor into a container, baler or TubeBags. It reduces both space requirements for waste and cost of disposal.

A photograph of a compacting machine. The machine is a large, blue, rectangular unit with a white, flexible, bell-shaped hood attached to the top. The hood is positioned over a waste source, and the machine is designed to compact waste into a smaller, more manageable form.

Clean
Environment as dust particles, created in the process, are removed.

A photograph of a dust collection system. The system consists of a large, stainless steel, rectangular unit with a white, flexible, bell-shaped hood attached to the top. The hood is positioned over a waste source, and the unit is designed to collect and remove dust particles from the environment.

Industrial application

Lundberg Tech has successfully designed and installed vacuum waste handling systems for more than 40 years.

Lundberg Tech's solutions are able to cover all aspects of vacuum waste handling. The systems capture, convey, cut, collect and compact waste from an unlimited number of printing, production and packaging machines.

Automatic filter, clean air return filter, antistatic devices and all kinds of valves and diverting systems can be included. Lundberg Tech also provides onsite installation and service as well as repair of wear parts.

Lundberg Tech's list of references is impressive in terms of numbers, geography and customers.

ABOUT LUNDBERG TECH

Lundberg Tech was established in 1946 and is a Danish company situated on the outskirts of Copenhagen. Right from the beginning, Lundberg Tech worked on customer centered development, manufacturing and service solutions, which in the beginning of the 1980s brought the company to the subject of waste handling.

Today Lundberg Tech develops and manufactures a broad line of own Granulators and Cutters with

focus on high quality and fast delivery. As part of the unique waste handling concept Lundberg Tech also offers a product line of All-in-one Units for easy installation as well as Central Systems which can include all possible features.

Thanks to a unique waste handling concept Lundberg Tech is now one of the world's leading suppliers of waste handling systems "from the process machine to the collection unit".

Today more than 6000 Lundberg Tech waste handling systems and 10000 granulators and cutters are enjoyed by customers all over the world in places like Europe, USA, Canada, Australia, Japan and China.
