

VACUUM WASTE HANDLING

www.lundbergtech.com

 **LUNDBERG**
TECH
Our waste handling keeps production going

LUNDBERG TECH CONVERTS WASTE AND COVERS ALL ASPECTS OF WASTE HANDLING FROM PRINTING, PRODUCTION AND PACKAGING MACHINES

Capture

Waste in the process line where it is created. It enables higher production speed, less downtime, while removing dust from production lines.

Cut

Waste with the unique and reliable Granulator. It adds value by reducing the volume and easily conveys the waste over long distances.

Convey

Waste by vacuum, transport in a pipe system. Can cover unlimited distances and amount of machines.

Collect

Waste in a sack, TubeBag or container. Location flexibility for a clean waste handling process and easy disposal.

Compact

Waste by a compactor into a container, baler or TubeBags. It reduces both space requirements for waste and cost of disposal.

Clean

Environment as dust particles, created in the process, are removed.

Industrial application

Lundberg Tech has successfully designed and installed vacuum waste handling systems for more than 40 years.

Lundberg Tech's solutions are able to cover all aspects of vacuum waste handling. The systems capture, cut, convey, collect and compact waste from an unlimited number of printing, production and packaging machines.

Automatic filter, clean air return filter, antistatic devices and all kinds of valves and diverting systems can be included. Lundberg Tech also provides onsite installation and service as well as repair of wear parts.

Lundberg Tech's list of references is impressive in terms of numbers, geography and customers.

ABOUT LUNDBERG TECH

Lundberg Tech was established in 1946 and is a Danish company situated on the outskirts of Copenhagen. Right from the beginning, Lundberg Tech worked on customer centered development, manufacturing and service solutions, which in the beginning of the 1980s brought the company to the subject of waste handling.

Today Lundberg Tech develops and manufactures a broad line of own Granulators and Cutters with

focus on high quality and fast delivery. As part of the unique waste handling concept Lundberg Tech also offers a product line of All-in-one Units for easy installation as well as Central Systems which can include all possible features.

Thanks to a unique waste handling concept Lundberg Tech is now one of the world's leading suppliers of waste handling systems "from the process machine to the collection unit".

Lundberg Tech's waste handling solutions, including Granulators and Cutters, are trusted by customers across the globe. From Europe and North America to Australia, Japan, and China, businesses rely on our technology to efficiently manage waste, optimise production, and improve sustainability.
